JOB MARKET PAPER

Fiduciary Duty in the Municipal Bonds Market

I examine whether the imposition of fiduciary duty on municipal advisors affects bond yields and advising fees. Using a difference-in-differences analysis, I show that bond yields reduce by 9% after the imposition of the SEC Municipal Advisor Rule. Larger municipalities are more likely to recruit advisors after the rule is effective and experience a greater reduction in yields. However, smaller issuers do not seem to significantly benefit from the SEC Rule in terms of offering yield. Using novel hand-collected data, I find that the average advising fees paid by issuers does not increase after the regulation. Offering yields reduce due to lower markup at the time of underwriting, driven by issuers for whom advisors play a more significant ex-ante role in selecting underwriters. Overall, my results suggest that while fiduciary duty may mitigate the principal-agent problem between some issuers and advisors, it has limited effect on small issuers.
